To Whom It May Concern

Coleg Morgannwg is pleased to support the educational and business priorities of the Heads of the Valleys Innovation Programme for the area.

The College has developed close working relationships with HOVIP and our students, together with students from other further education institutions, have benefitted from participating in enterprise initiatives. These initiatives are key to ensure that young learners are equipped with the skills to compete in a global market and become successful business leaders of the future. The students have gained invaluable experience which has extended their knowledge and improved their research, problem solving, communication and presentation skills.

In addition this programme has supported many SMEs securing and extending the future jobs market in the area and the skills base.

Yours sincerely

J H Evans (Mrs)
Principal
